

PLANT	SKU #	NAME	DESCRIPTION	SPECIFICATION	SIZE	COST	COUNT
	100	Calla Lily <i>Zantedeschia aethiopica</i>	Clumps of long-stalked, shiny rich green, arrow-shaped leaves. White flowers in spring to early summer to 8" long appear on stems slightly taller than foliage. Perennial from rhizomes.	Full sun to partial shade. 2 - 4' tall. Soil tolerant and thrives in moist, even boggy soil.	1 Gal	\$5.00	13
	101	Catmint <i>Nepeta</i>	An extremely easy growing plant with few pests or problems. The billowing foliage is topped with spikes of blue flowers in early summer with repeat blooms throughout the season. Nepeta has slightly aromatic grey-green foliage that has a delicate lacy appearance.	Perennial. Full sun or partial shade Zones 4 - 8 Height 12" by width 24"	1 Gal	\$5.00	4
	103	New Zealand Flax <i>Phormium tenax 'Platt's Black'</i>	Phormium 'Platt's Black' (New Zealand Flax) - New Zealand Flax cultivar that has spreading and arching nearly black leaves that reach slowly upwards to 3 or 4 feet tall. Plant in full sun to light shade. Can tolerate fairly dry conditions (coastal) but looks best with occasional to regular irrigation.	Full sun to partial shade Zone 7-9 Deer resistant	1 Gal	\$5.00	7
	104	Scented Geraniums <i>Pelargonium</i>	House Plant. Most have small flowers but aromatic leaves, likes to be pot bound, regularly remove flowers to encourage more blooms. There are a varieties of these. The photo is generic.	Sun to part shade in hottest areas. Zone 8-9 it is possible to leave outside unless hard frost. Deer Resistant	1 Gal	\$5.00	10
	105	Lenten Rose <i>Helleborus orientalis</i>	Clump-forming, late winter-blooming perennial which typically grows 1-1.5' tall. Features large, cup-shaped, rose-like, usually nodding flowers (3-4" diameter) with center crowns of conspicuously contrasting yellow stamens.	Shade to partial shade Zone 2-10 Good well drained soil Blooms in late winter, early spring Cut leaves to ground in winter to see flowers appear Deer resistant	1 Gal 2 Gal 3 Gal	\$5.00 \$7.50 \$10.00	20 6 4
	107	Corkscrew Willow <i>Salix matsudana 'Tortuosa'</i>	Corkscrew willow twisted branches, to 30 feet tall, 20 feet wide, shallow roots, can be invasive, regular to ample water. We love this tree for its year-round attractiveness - neon-green new growth in spring, lush twisty leaves that sway in the wind during the growing season, and casually contorted branch structures that show themselves best in winter.	Full sun, Zone 3-11	1 Gal	\$5.00.	2
	108	Coreopsis (Tickseed) <i>Coreopsis</i>	Coreopsis, also known as Tickseed, is an easy to grow perennial that loves full sun and can thrive in many types of soil. Dependably perennial, these are tough plants that tolerate dry, hot weather and deliver long-lasting blooms.	Zone 4-9 Full sun to part shade, perennial 10-18 inches tall 1-2 feet wide Pollinator-friendly Deer-resistant	1 Gal	\$5.00	4
	109	Ivy Geranium <i>Pelargonium peltatum</i>	Tender perennials with somewhat brittle, trailing stems that spread to as much as 3' wide. They feature thick, lobed, medium green, ivy-like leaves and clusters of single or double flowers in shades of red, pink, lilac or white.	Full to partial sun Moist soil No deadheading necessary.	1 Gal	\$5.00	2
	110	Hollyhock <i>Alcea Rosea</i>	Robust, unfussy hollyhocks tolerate almost any well-drained soil as long as they get plenty of sun. Some varieties grow best in cool-summer areas, and they appreciate shelter from prevailing winds. Once established, they're quite drought-tolerant, but wet winters or any standing water may kill them; give them the best drainage possible. A summer blooming biennial that has an upright habit with thick sturdy stems.	Height: up to 9 feet Plant: 18" - 36" apart Exposure: Full sun to partial shade Flowers: May - June Soil: Evenly moist, organically rich	1 Gal	\$5.00	11
	111	Fig Leaf Hollyhock <i>Alcea ficifolia</i>	Introduced at the end of the 16th century, this is somewhat similar to the common single Hollyhock but is a substantially more robust plant and if you've had problems with Hollyhocks before, you'll appreciate their vigor. It has distinct, fig-leaf foliage & produces 5"-10" upright spikes of very beautiful, large single flowers in shade of yellow, copper, pink, red & white. This Hollyhock is considered a perennial & will act like one if cut back after blooming.	Height: 5-6 feet Space: 12" Exposure: Full Sun Bloom Time: July-September	1 Gal	\$5.00.	2
	112	Camas <i>Camassia leichtlinii</i>	Easy to grow, a stunning addition to your sunny border, a striking blue spire rising to the sky in your spring garden, a native plant that is easy to grow and free of most pests. Best left undisturbed once planted.	Height: 3 to 4 feet Space: 1 to 2 feet Exposure: Full sun to part shade Bloom Time: April to May Soil: Moist, fertile, acidic Water: Regular moisture during the spring growth and bloom, but will tolerate drier conditions after bloom	1 Gal	\$10.00	13

PLANT	SKU #	NAME	DESCRIPTION	SPECIFICATION	SIZE	COST	COUNT
	114	Fuchsia <i>Fuchsia magellanica</i>	Popular garden shrubs with medium growth rate and, once planted, they can live for years with a minimal amount of care. These plants are hardy in mild temperate areas. The long branches may be nipped during frosty weather, but the shrub will rebound in spring. Keep plants blooming longer by picking off spent blooms and fruits. To encourage branching, prune plants heavily in the spring and pinch off the tips of the new growth. Continue to pinch until the plant is filled out.	Height: up to 5 or 6 feet Space: 2 or 3 feet Exposure: Sun or part sun Bloom Time: June-December unless there is early frost Soil: Rich, moist soil with good drainage Water: deeply enough to saturate the soil only when the top 1-2 inches of soil is dried. Do not over water.	1 Gal	\$5.00	4
	115	Fuchsia <i>Fuchsia procumbent</i>	This perennial groundcover grows in sun or shade. The red berries are edible when ripe; however they do not get fully ripe in our climate. Tiny flowers have bright blue pollen. <i>Fuchsia procumbens</i> can cover a large area in a short time.	Height: 6 - 8 inches Space: 1 foot Exposure: Sun or part shade Bloom Time: July-September	1 Gal	\$5.00	8
	116	Himalayan Honeysuckle <i>Leycesteria formosa</i>	Leycesteria is a shrub with attractive, clean, bright green foliage with hints of red in the new growth. In mid-summer it is covered 4 inch long pendulous drooping clusters of dark purplish-red bracts and white flowers. Dark purple berries are produced in autumn. It is a fantastic plant for the perennial garden or shrub border. Grows best in moist but well drained conditions. Attracts birds, hummingbirds. Low maintenance.	Height: 3-6 feet or taller Space: 3 to 5 feet Exposure: Full sun to part shade Bloom Time: June to September	1 Gal	\$10.00	1
	117	Knotweed <i>Persicaria microcephala</i> 'Red dragon'	<i>Persicaria microcephala</i> , commonly known as knotweed or fleeceflower, is an herbaceous perennial that typically grows to 24" tall. It is native to forests and grassy areas in China. It is a stoloniferous spreader that is noted for having green stems clad with broad-ovate to triangular-ovate green leaves (to 2-4" long), each leaf being decorated with a lighter green chevron. Leaves remain green throughout the growing season. Campanulate white flowers (each to 1 1/4" long) bloom in late summer.	Height: 2-5 feet Space: 2-3 feet Exposure: Full sun to part shade Bloom Time: Late summer Low maintenance	1 Gal	\$5.00	3
	118	Hardy Fuchsia	Masses of red or pink flowers! Hardy Fuchsia puts on an unbelievable display of pendant flowers that act as beacons for hummingbirds from early summer to mid-fall. Extremely ornamental plants can grow up to six feet tall. Best of all, it's completely cold hardy.	Height: up to 5 or 6 feet Space: 2 or 3 feet Exposure: Sun or part sun Bloom Time: June-December unless there is early frost Soil: Rich, moist soil with good drainage Water: deeply enough to saturate the soil only when the top 1-2 inches of soil is dried. Do not over water.	1 Gal	\$5.00	7
	119	Phlox	Phlox brings lasting, mid summer color to the landscape on tall, thick columns of flowers, and are some of the easiest perennials to grow. They establish quickly with full sun, and are known for their pleasant vanilla-clove fragrance. Just a few phlox will add major color to your whole garden. Most varieties today are both deer and mildew resistant.	Height: 1 - 3 feet Space: 1 - 3 feet Exposure: Sun to part shade Bloom Time: Late summer Prefers well-drained soil	2 Gal	\$7.50	7
	120	Hardy Primrose <i>Primula kisoana</i>	Large velvety green leaves (to 3-6" long) with ruffled to shallowly-lobed margins form clumps of basal foliage (to 6" tall) which typically creep by stoloniferous rhizomes to form attractive foliage mats. Deep rose to rose-mauve flowers with deeply notched petals bloom in spring (April-May) in 2-6 flowered terminal umbels atop stout, leafless, rose-pink flowering stems which are covered with downy white hairs. Flowering stems rise above the foliage to 6-8" tall.	Height: 6 - 9 " Space: 6 - 9 " Exposure: Part shade Bloom Time: April-May Attracts: Butterflies	1 Gal	\$5.00	3
	121	Jacob's Ladder <i>Polemonium caeruleum</i>	A clump-forming perennial that earned its common name due to the rung-like arrangement of its pinnate, light green leaves. However, it is the flowers of Jacob's ladder that are the real attraction. The species form and its various cultivars send up clusters of flowers atop long stems in mid- to late-spring. The delicate foliage and the fluorescent color of the flowers make Jacob's ladder a favorite for shady areas.	Height: 1-2 feet Space 1-2 feet Exposure: Sun or part shade Bloom Time: June Prune severely after flowering to keep neat	1 Gal	\$7.50	8
	122	Douglas Hawthorn <i>Crataegus douglasii</i>	This handsome native ornamental has showy white flowers, glossy, dark green leaves. Sometimes a thicket-forming shrub, in its tree form, Douglas Hawthorn can grow to thirty feet.	Deciduous tree may be shrubby and spread into wide thickets. 30 - 40 feet tall. Exposure: Sun or part shade Moist to dry sites	1 Gal	\$5.00	5
	123	Cape Fuchsia <i>Phygellus</i>	Colorful, adaptable and feisty, Cape fuchsia (<i>Phygellus</i>) is a great garden plant that works wonderfully in summer containers, too, thanks to a seemingly endless supply of blossoms appearing reliably from spring to fall.	Height & Width: 3 - 5 feet Soil: Rich, well-drained Water: Regular Flower: Summer, Fall Exposure: Prefer full, bright sun. Attracts: Hummingbirds	1 Gal	\$5.00	10
	124	Oso Berry <i>oemleria cerasiformis</i>	Osoberry is a fast-growing, multi-stemmed shrub to small tree with purplish-brown bark. In open sunny locations it may form a dense shrub, while in the shade it becomes more open to sprawling. This is a native shrub. Leafs and flowers in the spring, providing an important early nectar source for pollinators. Great for a bird garden.	Height: Mature 15 feet Width: Mature: 5 - 10 feet Soil: Average, well-drained, rich Water: Dry, Moist Exposure: Full Sun, part shade, full shade	1 Gal	\$5.00	1

PLANT	SKU #	NAME	DESCRIPTION	SPECIFICATION	SIZE	COST	COUNT
	125	New Zealand Flax <i>Phormium Tenax</i>	Ornamental, well behaved, purple flax—great for texture in pots or in gardens.	Height: 1 - 2 feet Exposure: Full to part sun Average soil and water	1 Gal	\$5.00	40
	126	Verbena <i>Verbena Bonariensis</i>	This perennial sends up purple flowers, great for airy structure in arrangements. Very drought tolerant. It has sharp stems so it should deter deer. Accepts poor soil. Sunny positions are best for this plant.	Exposure: Sun Deer Resistant	1 Gal	\$5.00	4
	127	Naked Lady Lily <i>Amaryllis Belladona</i>	2 bulbs per pot. Strappy green lily type foliage in late winter to mid- summer when it disappears! Then it sends up shoots of multiple flowers pink flowers per stem. Full to part sun. Average to poor soil. Drought tolerate.	Exposure: Full to part sun Soil: Average to poor Drought tolerant	1 Gal	\$5.00	12
	128	Lamb's Ears <i>Stachys Byzanthia</i>	A favorite for growing with kids, the lamb's ear plant (<i>Stachys byzantina</i>) is sure to please in nearly any garden setting. This easy-care perennial has velvety soft, wooly evergreen leaves that are silver to gray-green in color. The foliage is also similar in shape to that of a real lamb's ears, hence its name. If left to bloom in summer, lamb's ear will produce spikes of pink to purple colored flowers too. In addition to enjoying its attractive, fuzzy foliage, the leaves can be used as a "band-aid" of sorts for healing wounds and in helping painful bee stings.	Exposure: Full sun 1/4 shade Soil: Accepts poor well drained soil Water: Moderately drought tolerant	1 Gal	\$5.00	10
	129	Nootka Rose <i>Rosa Nutkana</i>	<i>Rosa nutkana</i> , the Nootka rose, bristly rose, or wild rose is a 2–10 feet tall perennial shrub in the rose family. The species name nootka comes from the Nootka Sound of Vancouver Island, where the plant was first described. This plant is native to Western North America. Great hedgerow plant.	Exposure: Full sun Water: Drought tolerant. Water first year until established. Soil: Accepts poor soil Deer resistant	1 Gal	\$5.00	8
	130	Kiwi Blue <i>Cerinthe</i>	The drooping habit of the flowers makes an elegant addition to bouquets. The brilliant-blue flowers are complemented by the gray-green foliage. Attracts bees and hummingbirds. Also known as honeywort. Easy to grow annual in humus soil or bark. Plant in masses and let self sow for return year of luscious blooms of blue and purple.	Exposure: Full to part sun Water: Moderate Soil: Humus soil or bark Attracts hummingbirds	1 Gal	\$5.00	12
	131	Dark Knight <i>Scabiosa</i>	Pin cushion perennial flower. Hummingbirds and go crazy after blooms. Long blooming seasons if deadheaded. Easy to grow!	Height: 1 - 2 feet Exposure: Full sun to part sun Soil: Average Water: Moderate	1 Gal	\$5.00	8
	132	Sungold Butterfly Bush <i>Sungold Buddelia x weyeriana</i>	A vase like shrub that blooms yellow cone shaped flowers in late summer. This Buddleia or Buddleja is a large, dark green shrub with hundreds of yellow-gold blossoms that are round to oval. It has dense tight foliage that makes a nice privacy hedge, at least in the summer.	Height: 6 to 8 feet Water: Somewhat drought tolerant Exposure: Full sun is best Very attractive to bees	1 Gal	\$5.00	4
	133	Columbine	Double purple and white flowers. Perennial, self seeding.	Height: 24" Width: 12" Exposure: Full sun	1 Gal	\$5.00	2
	134	Bear's Breech <i>Acanthus mollis</i>	Stately and vigorous. A semi-evergreen clump-forming perennial boasting strikingly elegant spikes of hooded, creamy-white flowers adorned with dusky purple bracts. Blooming from early to mid-summer, they rise well above a superb foliage mound of large, shiny, deeply-cut, dark green leaves. Easy to grow, requires very little care, lasts well in bouquets and makes striking dried arrangements. Plants can spread aggressively by creeping rootstocks.	Height: 3-5 feet Width: 2-3 feet Exposure: Full sun or part shade	1 Gal	\$5.00	3
	135	Feverfew <i>Tanacetum parthenium</i>	Masses of one-inch, white, daisy-like flowers with large yellow centers rise on spindly stems above parsley-like leaves.	Height: 24 inch Width: 12 inch	1 Gal	\$5.00	3

PLANT	SKU #	NAME	DESCRIPTION	SPECIFICATION	SIZE	COST	COUNT
	136	Italian arum <i>Arum italicum</i>	A stemless woodland species native to Europe. Italian Arum is a tuberous perennial grown for its spectacular foliage and bright red berries. When the rest of the garden goes to sleep in the fall, the glossy, arrow-shaped leaves appear and persist through winter, withering in mid-spring. Greenish ivory flowers resemble those of its relative, Jack-in-the-Pulpit, and appear in midsummer followed by stunning orange-red berries that may last on the plant until the foliage returns again in the fall. In some areas, plants can self-sow vigorously so choose a location where that won't be a concern. All parts are very poisonous and should not be planted near vegetables or where children play.	Height: 1 to 1.5 feet Spread: 1 to 1.5 feet Bloom: April to May Exposure: Part shade to full shade Water: Medium CAN BE INVASIVE	1 Gal	\$5.00	1
	137	Chilson's Pride Dahlia Tuber	Chilson's Pride is a fabulous, heirloom, decorative-form dahlia. It boasts generally strong stems (it's so vigorous, so keep the stems cut deep!), and is an excellent re-bloomer. This dahlia stays strong to the end of the season for us, and is a pastel ombré from creamy middle to true pink out petals.	Flower Size: 4.5" Plant Height: Approx. 42" Bloom Time: Mid season Divide every couple years	3 Gal 1 Gal	\$7.50 \$5.00	3 5
	138	Gladiola Bulbs (6 assorted per pot)	Tall, colorful gladiolus make outstanding floral displays. Planting gladiolus bulbs is an economical way to bring attention to foundation, focal points and more. Gladiolus flower cover tall, straight stalks - creating a dramatic and beautiful garden display.	Exposure: Full sun Height: 3 feet	3 Gal 6/pot	\$5.00	7
	139	Marshall Strawberries	Once abundant in the Pacific Northwest (RIGHT HERE ON VASHON AT MUKAI FARM) and praised as "the finest eating strawberry in America," the Marshall strawberry is today very rare. Marshall strawberries are again highly sought after, considered by foodies to be the sweetest, most toothsome of their clan. James Beard food connoisseur called the Marshall the most delicious strawberry ever grown.	Full sun Good soil Good drainage Lots of water = lots of berries Great berries!	4 inch Flat (18) 2 Gal (6)	\$4.00 \$54.00 \$18.00	48 3 4
	140	Wild Geranium (Cranesbill) <i>Geranium x oxonianum 'Wargrave Pink'</i>	Tough, vigorous and incredibly pretty. A superb hard geranium cultivar with luminous, salmon pink to silver pink, open-faced flowers. Bushy, compact and semi-evergreen. It is a good weed-choker and a useful ground cover plant. Self seeds.	Height & Width:: 18 - 24 inches Very little maintenance	2 Gal	\$5.00	1
	143	Bearded Iris - Bronze	Bearded Irises combine ethereal beauty with a thoroughly practical, hard-working nature. As long-lived perennials, Bearded Irises can take summertime drought, flourishing in any sunny spot and on a wide range of soils, as long as they are well drained. Bearded Irises are traditional highlights of the June perennial border but show up well in cottage plantings, too.	Height: 3 feet Width: 12 inches	3 Gal	\$5.00	2
	144	Bearded Iris - Purple & White	Bearded Irises combine ethereal beauty with a thoroughly practical, hard-working nature. As long-lived perennials, Bearded Irises can take summertime drought, flourishing in any sunny spot and on a wide range of soils, as long as they are well drained. Bearded Irises are traditional highlights of the June perennial border but show up well in cottage plantings, too.	Height: 3 feet Width: 12 inches	3 Gal	\$5.00	3
	145	White Pom Pom Dahlia	4" white blossoms, long stems for cutting. Divide every couple of years.	Height: 4 feet Exposure: Full sun	3 Gal	\$7.50	1
	146	Tahitian Sunrise Dahlia	Tahiti Sunrise' Dahlia is a vibrant, colorful variety with petals that progress from yellow to red to purple, recalling a breezy, tropical sunset. A semi cactus variety, each pointed petal is a tightly-rolled tube upon close inspection, which gives the flowerhead a sense of fullness and heft. Planted in full sun, this colorful specimen will deliver a magical amount of long-lasting summertime blooms.	Mature plant size 20-24" Exposure: Full Sun	1 Gal or larger	\$5.00	2
	147	Black Beauty Dahlia	Beautiful 5" blooms of black red are an excellent variety for cutting. Nice contrast when used with almost any color in floral arrangements or garden plantings.	Height: 5 feet Exposure: Full sun	1 Gal or larger	\$5.00	3
	148	Fringed Start Dahlia	The 'Fringed Star' dahlia will stand out and be noticed in your garden. With it's large, impressive blooms of soft peach with a yellow center. Super strong stems on this dahlia and it's very generous with how many flowers and tubers it produces. Fringy petals work well in arrangements and bouquets.	Height: 4 feet Exposure: Full sun - 6 + hours Bloom Size: 6" to 8" Bloom Time: July to October	1 Gal or larger	\$5.00	6
	149	Neon Red Dahlia Water Lily Shape Flower	Photo from garden is best representation.	Exposure: Full sun - 6 + hours Bloom Size: 6" to 8" Bloom Time: July to October	1 Gal or larger	\$5.00	5

PLANT	SKU #	NAME	DESCRIPTION	SPECIFICATION	SIZE	COST	COUNT
	150	Sunny Yellow Dahlia	Lovely 4" soft yellow blooms will remind you of a refreshing glass of lemonade. These blooms are a joy to arrange. Nice stems for cutting produced on a plant of 4'. Great garden and cutting variety.	Exposure: Full sun - 6 + hours Bloom Size: 6" to 8" Bloom Time: July to October	1 Gal or larger	\$5.00	12
	151	Large White Dahlia	The pristine white blooms are sure to impress whether planted in a garden border or in patio pots and containers. The giant flowers also make exceptional cut flowers for the vase and will stand out in any bouquet. Flowers June to September.	Exposure: Full sun - 6 + hours Bloom Size: 6" to 8" Bloom Time: July to October	1 Gal or larger	\$5.00	3
	152	Large Pink Dahlia	Photo from garden is best representation.	Exposure: Full sun - 6 + hours Bloom Size: 6" to 8" Bloom Time: July to October	1 Gal or larger	\$5.00	3
	176	Lilac Sensation <i>Syringa vulgaris</i>	An outstanding lilac noted for its large trusses of purple-red florets edged in white. A mid-season bloomer that typically flowers in mid-May. Branches are erect and open with rich green foliage. Use to create a beautiful spring flowering hedge, screen, or accent. Deciduous.	Water: Weekly, more in heat Height: Reaches 10 feet Width: Reach 8 - 12 feet Bloom Time: Spring	1 Gal 3 Gal	\$5.00 \$7.50	4 4
	153	Flowering Maple <i>Abutilon x hybridum</i>	Arching and weeping, with nearly constant production of orange-yellow, drooping blossoms. Tender perennial. Northern gardeners may wish to grow these sub-tropical specimens in containers so that it is easier to bring to grow these sub-tropical specimens in containers so that it is easier to bring them indoors in the fall, where they will be grown as houseplants during the winter.	Exposure: Full sun to partial shade Water: Moderate water, regular water	3 Gal	\$7.50	2
	154	Rosa Glauca	This species rose features glaucous purplish gray-green foliage resistant to black spot. Small clusters of single pink flowers with gold centers cover this deciduous shrub in late spring and early summer. In autumn, scarlet hips provide late season interest in addition to attracting wildlife. This handsome rose, grown for its blue-purple leaves, should be included in every garden.	Exposure: Full sun Water: Drought tolerant when established Height: 5 - 9 feet Width: 4 - 7 feet	1 Gal 3 Gal	\$5.00 \$7.50	2 8
	155	Aster	Asters are easy to grow perennial plants that take care of themselves all summer long. Their vigorous blooms appear later in the season, right when other flowers begin to fade. A surefire way of adding great fall color for years to come, Asters' gorgeous flowers will stay true and strong until hard frosts set in. Aster is a popular and dependable food source for Monarch butterflies, who rely on the nectar of late-season blooms to fuel their fall migration.	Exposure: Full sun Height: 12 to 15 inch Bloom Time: Late summer	3 Gal	\$10.00	17
	156	Peach-Leaved Bellflower <i>Campanula persicifolia</i>	Combining grace and elegance, Campanula persicifolia is a clump-forming perennial that sends up tall, sturdy stems which bear large, outward-facing, cup shaped, single or double flowers in shades of violet-blue to white. Blooming over a long season, the enchanting flowers rise above spreading mats of narrow, toothed, bright green leaves, adding color and contrast to the garden	Height: 2 - 3 feet Soil: Chalk, loam Exposure: Full sun, partial sun Water: Average	3 Gal	\$10.00	15
	157	Rhubarb Edible	Rhubarb, also known as pieplant, is an herbaceous perennial grown for its unique, tart flavor of the thick leaf stalks (petioles). Rhubarb sends up its thick, edible stalks early in the spring, a much-anticipated harbinger of the coming growing season. Harvest can begin as soon as the stalks are large enough to cut and continues on through late spring. The leaves are not edible.	Height: 2 to 3 feet Spread: 3 to 4 feet Exposure: extra protection from sun. Needs afternoon shade.	1 Gal	\$5.00	2
	158	Lady's Mantle <i>Alchemilla mollis</i>	If you want to add some cottage-style charm to your garden, plant Lady's Mantle (<i>Alchemilla mollis</i>). It's an old-fashioned herbaceous perennial that, besides being beautiful in gardens, is also used in making lotions and soaps. Lady's Mantle is a long-lived perennial flower that is fairly low-maintenance and blends well with other spring bloomers. The foliage looks good all season and can make a nice ground cover under small trees.	Exposure: Part sun to shade Height: 6 - 12 inches Space: 8 - 12 inches apart Water: regular in full sun or extreme heat	1 Gal	\$5.00	17
	159	Hosta 'Pacific Blue Edger'	A small blue edger. Excellent substance, forms pinwheel mounds. A vigorous growing blue with lavender flowers; sport of Hosta 'Gold Edger'.	Height: 14 inches Wide: 30 inches Exposure: Light shade	1 Gal	\$7.50	40

PLANT	SKU #	NAME	DESCRIPTION	SPECIFICATION	SIZE	COST	COUNT
	160	Russian Sage <i>Perovskia atriplicifolia</i>	Tall, airy, spike-like clusters create a lavender-blue cloud of color above the finely textured, aromatic foliage. This vigorous, hardy, heat-loving and drought tolerant plant resists deer and pests. A superb companion for perennials, succulents and ornamental grasses. Deciduous. Not edible.	Exposure: Full sun Height & Width: 3 feet Bloom Time: Summer Watering: Once established, water occasionally.	1 Gal	\$5.00	6
	162	Ornamental Rhubarb <i>rheum rhabarbarum</i>	One of the most pleasing of the tall ornamental rhubarbs, this prehistoric-looking specimen has colossal divided leaves that first emerge in reddish bronze tones. Warm weather brings dark green foliar hues on top and purple-infused undersides plus airy maroon panicles surmounting towering flower stalks. Later red shades enliven the foliage for a superb fall finale. They require deep, rich soil and appreciate mulching in the summer to keep their roots cool, as they detest extreme heat.	Height: 5 to 6 feet Spread: 3 to 4 feet Exposure: extra protection from sun. Needs afternoon shade	1 Gal	\$5.00	1
	163	Shasta Daisy <i>Leucanthemum 'Becky'</i>	Large, classic, white, single blooms with yellow centers on a lush mound of coarse, leathery, green foliage. A wonderful, long-lasting cut flower. The sturdy flowers remain attractive even after a hard rain. Excellent in sunny borders and in containers for patio or landscape accents.	Exposure: Full sun Bloom Time: Summer Height: 3 to 4 feet Width: 1 to 2 feet wide	3 Gal	\$7.50	5
	164	Culver's Root <i>Veronicastrum virginicum</i>	Culver's Root can offer a strong upright accent to any perennial garden or prairie/savanna. It's an elegant unbranched plant, reaching heights of 5' with candelabra-like spikes of white flowers that open from the bottom up mid-summer. The small white flowers densely packed together can sometimes take on a purple hue; the contrast of these flowers against the dark green foliage is stunning.	Exposure: Full sun Heights: 3 to 5 feet Bloom Time: June to August Water: Medium to wet Attracts: Butterflies	3 Gal	\$10.00	2
	165	Yellow Loosestrife <i>Lysimachia punctate</i>	Native to central Europe and Turkey, this plant is easy to grow and excellent at providing fast-spreading cover when required, creating great visual impact. However, attention should be paid to controlling its spread as this plant tends to be invasive. A perfect plant for cottage gardens, wild gardens, bog gardens or next to ponds and streams. Excellent as long-lasting cut flowers.	Exposure: Full sun to partial shade Water: Moderate water Height: 6 - 12 inches Width: 12 to 18 inches	3 Gal	\$7.50	1
	166	Ponytail Palms <i>Beaucarnea recurvata</i>	In recent years, the ponytail palm tree has become a popular houseplant and it is easy to see why. Its sleek bulb-like trunk and lush, long curly leaves make it visually stunning; and the fact that a ponytail palm is forgiving and easy in its care makes this an ideal houseplant for many people. GREAT GIFT!	Exposure: Bright light Water: Dry Repot when root bound Check for additional care instructions on the web.	6 inch ceramic pot	\$10.00	2
	167	Peruvian Lily <i>Alstroemeria Inca Bandit</i>	Alstroemeria Inca Bandit has tropical looking, bright red blooms with black whiskers. It forms a bushy, upright clump of linear, emerald green tropical looking leaves. Excellent cut flower (pull stems rather than cut).	Height: 16" to 18" Width: 16" to 24" Soil: Average, well-drained, rich Water: Regular Flower: Summer, Fall Exposure: Mostly sunny	6 inch	\$5.00	2
	168	Peruvian Lily <i>Alstroemeria Inca Sundance</i>	Soft, buttery yellow blooms with a distinct brown marking in the throat make this selection the perfect complement to other flower colors in the garden. It forms a good, compact mound of waxy green foliage and short stemmed flowers. Excellent cut flower (pull stems rather than cut).	Height: 16" to 18" Width: 16" to 24" Soil: Average, well-drained, rich Water: Regular Flower: Summer, Fall Exposure: Mostly sunny	6 inch	\$5.00	2
	169	Raspberry	Red fruit. Bear mid-season and have some secondary fruit. Very hearty: tolerate clay soil that kills other variables with root rot.	Exposure: Full sun Water: Regular	1 Gal	\$5.00	28
	170	Hardy Geranium	Hardy Geranium are the true perennial geraniums, with long bloom seasons and a neat growth habit		1 Gal	\$5.00	1
	171	Mystery Rose	I would love to tell you all about these roses, but I can't! They are a mystery. Take a chance on these for a beautiful surprise in your garden. These are mature roses, planted in 3 gallon pots. Very healthy!		3 Gal	\$7.50	4
	172	Nooka Rose <i>Rosa nutkana</i>	Nooka Rose is beautiful but can be aggressive. It is great as a barrier plant, growing into an impenetrable thicket. Its fragrance fills the air in a seaside habitat. It is valuable for stabilizing banks, especially along streams.	Exposure: Full sun to part shade Soil: Medium to fine with neutral pH Water: Not draught tolerant	2 Gal	\$5.00	3

	173	Mystery Butterfly Bush <i>Buddleia</i>	The butterfly bush (<i>Buddleia davidii</i>) is a beautiful, fast-growing, deciduous shrub with masses of blossoms—long, spiked trusses—that bloom from summer to autumn. Its flowers come in many colors, though butterflies seem to prefer the lavender-pink (mauve) of the species to the white and dark purple cultivars. Also called "summer lilacs". The shrub is low-maintenance, only requiring dead-heading and annual pruning in later winter to encourage flowers and a compact shape.	Exposure: Full sun Water: Freely in growth, sparingly otherwise Soil: Fertile	1 Gal	\$5.00	1
	174	Hebe speciosa 'Variegata'	<i>Hebe speciosa 'Variegata'</i> is an upright, rounded, evergreen shrub forming a mound of slender, gray-green leaves with irregular creamy-white margins. ... In summer, pretty spikes of violet-purple flowers appear on the tips of the branches, eventually smothering the shrub. They are attractive to butterflies and hummingbirds	Exposure: Full sun, partial sun Height: 2 to 3 feet Water: Average Attracts: Butterflies, hummingbirds	1 Gal	\$5.00	1
	175	Pink Peony	Add a feminine touch to arrangements with Pink Peony Flowers. Peonies arrive in tight, ball-shaped buds, but quickly open into lush, cloud-shaped blooms.	Exposure: Full sun with afternoon shade Water: 1 inch per week	2 Gal	\$5.00	4
	177	<i>Euonymous fortunei</i>	Sturdy evergreen ground cover with tiny, leathery, dark green leaves. Stems will root when they come in contact with the soil. Tolerates most well-drained soils and is somewhat drought tolerant once established. Great selection for low ground cover, planted between pavers or cascading over a wall. Tolerates varying amounts of foot traffic.	Height: 4 inches Width: 18 inches Exposure: Full sun to partial shade	4 inch	\$3.00	5
	178	Black Eyed Susan <i>Rudbeckia</i>	The black eyed Susan flower is a versatile, heat and drought tolerant specimen that should be included in many landscapes. Black eyed Susan plants grow all summer long, providing perky color and velvety foliage, requiring little care from the gardener. Good as cut flowers, naturalizing.	Exposure: Full Sun, Partial Shade Well drained soil Plant 12 - 18 inches Height: 18 - 30 inches Bloom Time: Late summer	1 Gal	\$3.00	5
	179	Lance Corporal <i>Persicaria virginiana</i>	'Lance Corporal' is an upright, clump-forming, herbaceous perennial bearing ovate, bright green leaves with a prominent, dark red to black, chevron-shaped mark in the centre of each leaf. Slender, loose racemes of green flowers that turn red with age bloom in late summer and early autumn. Compact.	Height: 18 - 24 inches Space: 16 - 36 inches Exposure: Part sun, part shade Bloom Time: Summer to fall Water: Medium, drought tolerant	4 inch 1 Gal	\$3.00 \$5.00	15 10
	180	Rose of Sharon - White	Rose of Sharon is an easy-to-grow, undemanding plant, happy in full sun to part shade. It prefers moist, well-drained soil but is tolerant of many growing conditions. Prune in late winter or very early spring, if you want to control the size of your plants. Cutting back to two or three buds per branch will help encourage larger flowers. Few pests damage the plants, with the exception of Japanese beetles.	Exposure: Partial to full sun Height: Reaches 8 - 12 feet Width: 4 to 6 feet Water: Regular Bloom Time: Late summer thru fall Attracts: Butterflies and hummingbirds	2 Gal	\$5.00	4
	181	Japanese Anemone	Floating above the border, they produce masses of 2 to 3 inch flowers that are held on slender, graceful stems and sway delicately in the breeze. Elegant at every stage, from tight buds to neat spherical seedbeds, they send up flowers in succession, week after week, and are worthy of prominent placement in the garden.	Exposure: Full to part sun Height: 2 to 4 feet Spread: 2 to 4 feet Water: Average	1 Gal	\$5.00	2
	182	Bear's Breach <i>Acanthus spinosus</i>	Description: Hardy, herbaceous perennial — Pure white flowers with purple bracts on 3' stalks, blooms in late spring to midsummer; shiny, dark green, deeply cut leaves with spiny margins.	Height: 4 feet Width: 3 feet, clump form Exposure: Full sun to part shade Soil: Deep, moist, well-drained humus rich woodland loam. Attracts: bees	4 inch 1 Gal	\$3.00 \$5.00	12 2
	183	Annabelle Hydrangea <i>Hydrangea aborescens</i>	Famous for its huge, snow-white blooms and excellent cold hardiness. This shorter variety grows 3 - 5 ft tall and flowers reliably, even after severe winters and intentional pruning. Its enormous 10" blooms and ability to adapt to both cold and heat have made 'Annabelle' one of the most popular hydrangeas in the country.	Height: 36 - 60 inches Width: 4 - 6 feet Bloom Time: Mid Summer to fall Exposure: Half sun/shade to full shade	1 Gal	\$7.00	4
	184	Orange New Zealand Sedge <i>Carex Testacea</i>	The orange part comes from the coppery-brown foliage color in the arching leaves. It is a clumping grass valuable for its year-long appeal.	Exposure: Full sun to part shade Height: 18 to 24 inches Water: Evenly moist soil Soil: Well-drained but moist	4 inch	\$3.00	10
	185	Foxglove <i>Digitalis purpurea</i>	Tall and stately foxglove plants have long been included in garden areas where vertical interest and lovely flowers are desired. Foxglove flowers are clusters of tubular shaped blooms in colors of white, lavender, yellow, pink, red, and purple. Growing foxgloves thrive in full sun to partial shade to full shade, depending on the summer heat.	Exposure: Full sun to shade Height: Up to 6 feet Water: Medium Deer Resistant Foxglove is poisonous	1 Gal	\$5.00	25

PLANT	SKU #	NAME	DESCRIPTION	SPECIFICATION	SIZE	COST	COUNT
	186	Phlox David <i>Phlox paniculata</i>	Blooms in mid-summer with round heads of large, pure white, delightfully fragrant flowers. The foliage is mildew resistant and this perennial grows easily in compost-enriched garden soil. The 2002 Perennial Plant Association Plant of the Year. Good cut flowers.	Exposure: Full sun Height: 36 - 40 inches Width: 18 inches Attract: butterflies, hummingbirds, birds	2 Gal	\$5.00	6
	187	Staghorn Sumac Tree <i>R. typhina</i>	Want something completely different, super-exotic looking, and incredibly tough and hardy, that nobody else has in their landscape? Think sumac!—Small trees, up to 15 feet tall, with fern-like compound leaves which make great loose-textured landscape accents, highly favored as small courtyard trees in English and European gardens and as erosion control in hard-to-mow dry hillsides. Unlike its close relatives, poison ivy, oak and sumac, the landscape sumacs do not cause itchy rashes. Easy to grow. WILL SPREAD! Stunning fall color.	Exposure: Full sun to part shade Height: Up to 10 - 15 feet Will Spread!	1 Gal 3 Gal	\$5.00 \$7.50	19 8
